Recent Honours Information Technology graduate with experience in software development, quality assurance, and robotic process automation. Skilled in React, JavaScript, Node.js, and Automation Anywhere 360, with experience developing test cases, performing QA testing, and supporting automation initiatives.

TECHNICAL SKILLS

- Programming Languages: JavaScript, TypeScript, Python, Java
- Frontend: React, Angular, HTML, CSS, Bootstrap
- Backend & APIs: Node.js, Express.js, REST APIs
- Databases: MongoDB, Firebase Firestore, SQL
- Data & Analytics: Data Analytics, Machine Learning
- Cloud & AI: Azure Machine Learning, Azure DevOps, MCP, AI Agents/Prompt Engineering, Machine Learning
- Testing & Automation: Automation Anywhere 360, Robotic Process Automation (RPA), Quality Assurance (QA), UAT, Test Case Development
- **Tools & Platforms:** VS Code, Visual Studio, Postman, SQL Server Management Studio (SSMS), Git, GitHub, Azure DevOps, Azure Machine Learning

EXPERIENCE

Robotic Process Automation (RPA) Intern | First Canadian Title (FCT) | May 2026 - Present

- Developed and tested Automation Anywhere bots to automate client verification, cheque batch creation and printing, and request-for-service workflows for financial operations.
- Built a dynamic RPA solution that generated request-for-service submissions from Excel data by filtering transactions based on province.
- Tested and validated a document automation solution by verifying document parsing, database updates using SQL queries, and UI application functionality.
- Developed test cases using AI agent and MCP server connected to Azure DevOps, validating application behavior against Process Design Document (PDD) requirements.
- Investigated, documented, and resolved automation issues to support testing, defect resolution, and workflow reliability.
- Authored workflow documentation and knowledge transfer materials to support deployment and ongoing maintenance.

Application Developer Intern | First Canadian Title (FCT) | April 2024 - August 2024

- Developed production-ready Angular components to accelerate feature delivery and improve UI consistency.
- Integrated UI updates and backend APIs to streamline data flow and workflow efficiency.
- Collaborated with developers and QA teams in Agile environments
- Utilized Git and Azure DevOps for version control, issue tracking, and collaborative development.

PROJECTS

Clinical Trial Tracker Platform | React, Node.js, Express, MongoDB

- Developed a full-stack platform for searching and tracking clinical trial opportunities using ClinicalTrials.gov data.
- Implemented advanced filtering and scalable frontend-backend architecture using React and REST APIs.

Full-Stack Vinyl Marketplace | Node.js, Express, Firebase

- Built a marketplace application supporting user authentication, item listings, and record browsing.
- Implemented Firebase database integration and version control using Git/GitHub.

EDUCATION

York University | Honours Bachelor of Arts in Information Technology | June 2026

- Tom Janes Scholar - \$20,000 Renewable Entrance Scholarship
- Dean's Circle of Student Scholars (DCSS)
- Dean's Honour Roll
- Sessional Academic Achievement List
